**VIBURNUM CARLESI**

A Korean shrub, absolutely hardy, more or less wooly, resembling a little in wood and foliage the Viburnum Lantana. Inflorescent terminal, the buds appearing in Autumn. It develops in April, and produces large corymbs of flowers, all fertile and similar, measuring three-fourths of an inch in diameter, with a half inch tube and five rounded lobes. Color rosy white, passing to pure white. Flowers exhale a delicious fragrance, as fine as that of Jasmin, and when the plant is freed in a temperate house, the entire atmosphere is perfumed. The bush remains a low clump. See Page 41 for prices.

AUTO-TRUCK DELIVERY

We make deliveries by auto-truck within reasonable distances from the nurseries when desired, and charge according to mileage and size of truck used. We are located 18 miles south of Boston.

Silver Medal awarded us by the Massachusetts Horticultural Society
for the best display of Herbaceous Flowers.

HERBACEOUS DEPARTMENT

The growing of Herbaceous Perennials is one of the important features of our business. We have over fifteen acres devoted exclusively to the growing of Perennials. Our stock and variety of plants was never so large as now, and we feel sure that we can furnish this most popular class of plants from our fields that will be not only second to none, but far superior to much of the seedling pot-grown and divided stock which is being offered at low rates. Field grown stock of the proper size will secure for the planter the best possible results.
